SEO / GEO / AEO Audit Report

FULL AUDIT · plus Local SEO and Technical SEO

SEO	GEO	AEO
9	7	10
Strong	*On Track*	*Strong*

12 October 2026

Claude Skill and Plugin by Alex Labat

Executive Summary

Visalatchi Manufactures has a technically excellent site: all 39 pages are prerendered, uniquely titled, canonicalised and carry rich, valid schema, and Lighthouse scores 100 for Accessibility, Best Practices and SEO. This audit closed the remaining on-site gaps: six pages had no question content and the homepage had almost none, two had broken heading order and six were barely linked. AEO is now 10/10 and SEO 9/10. GEO stays at 7/10 because the rest is off-site and owner-supplied: the brand has no third-party listings, no reviews and blank company facts (founding year, capacity, certifications). Those cannot honestly be created in code. The single most urgent step is deploying this build, because the live site still runs an older version.

Dimension	Before	After	Status	Key Takeaway
SEO	9/10	9/10	Strong	On-page and technical are exemplary; inner-page mobile speed (~75) and zero backlinks hold back a 10.
GEO	7/10	7/10	On Track	Content and crawlability are AI-ready; entity authority (listings, reviews, credentials) is missing.
AEO	8/10	10/10	Strong	Question headings, 40-60 word answers, FAQPage/HowTo/Speakable on 27 pages.
Combined	24/30	26/30		Local SEO: 59/100 (est.). Technical: Mostly clean.

Pages Audited

All 39 URLs in sitemap.xml were crawled from the production build (the version you will deploy), plus robots.txt, llms.txt and the 404 page.

URL	Page Type	Notes
/	Homepage	Q&A block + FAQPage added; WebSite, LocalBusiness, Speakable
/products	Product hub	12 Product schemas, MOQ table
/products/* (12 pages)	Product pages	Product + FAQPage + Speakable, 880-920 words each
/appliance-packaging-boxes, /bulk-packaging-boxes, /corrugated-box-manufacturer-chennai, /5-ply-7-ply-corrugated-boxes, /pump-motor-packaging-boxes, /mixer-grinder-packaging-boxes	Commercial landing pages	830-1,220 words, 8-9 question headings, FAQPage

URL	Page Type	Notes
/d2c-packaging, /food-packaging, /export-packaging	Segment pages	Q&A + FAQPage added to D2C and export
/process	Process	HowTo + FAQPage added; word count 329 to 541
/about	About / E-E-A-T	Q&A block with plant address and hours added
/team/palaniappan, /team/periyanan	Author pages	ProfilePage; Q&A added (280 to 400+ words)
/faq	FAQ	17 Q&As, FAQPage; heading order fixed (H1 to H2)
/contact	Contact / NAP	Q&A added; team names now link to profiles; heading fixed
/blog + 9 posts	Blog	Article schema, named bylines, 6-9 external citations per post, dated
robots.txt, sitemap.xml, llms.txt, llms-full.txt	Crawl files	AI crawlers allowed; 39 URLs with real lastmod

SEO Analysis: 9/10

Technical On-Page

Signal	Finding	Status
Title tags	All 39 unique, 52-60 characters, keyword first (e.g. "Bulk Packaging Box Manufacturer Chennai | TV, Fan & Mailer").	Good
Meta descriptions	All 39 unique, 143-158 characters, each ends in a call to action. Enforced at build time by prerender.ts.	Good
H1	Exactly one H1 on every page; no duplicate H1s across the site.	Good
Heading order	/faq jumped H1 to H3 and /contact had an H3 before its first H2. Both corrected; 0 skips across 39 pages.	Fixed
Canonicals	Self-referencing, https, no-www on all 39 pages; no canonical chains.	Good
Robots meta	index, follow, max-image-preview:large on every page; 404 page is noindex.	Good
Internal links	0 broken. Previously 3 landing pages, 2 products and 1 team page had 1-2 inlinks; footer links, rotating related products and contact-page profile links fixed this (minimum now 2-3).	Fixed
Image alt / dimensions	All images have alt text and explicit width/height.	Good
Open Graph / Twitter	og:title, og:description, og:image and twitter:card on every page.	Good
URL hygiene	Clean keyword URLs. vercel.json now sets cleanUrls and trailingSlash:false so /about/ cannot duplicate /about.	Fixed
Security headers	Added HSTS, X-Content-Type-Options, Referrer-Policy, X-Frame-Options and Permissions-Policy.	Fixed
Core Web Vitals (lab)	Lighthouse mobile: homepage ~85-88, inner pages ~73-79 performance; Accessibility, Best Practices and SEO 100. Field data (CrUX) not yet available.	Needs Attention

Content Quality

Signal	Finding	Status
Depth	Commercial pages 830-1,300 words; pillar posts 1,880-2,000 words; product pages ~900 words.	Good

Signal	Finding	Status
Freshness	Every post shows published and updated <time> dates; sitemap lastmod reflects real edits.	Good
Readability	Short paragraphs, spec tables on 29 of 39 pages, bulleted lists throughout.	Good
Thin pages	/process (329 words) and team pages (~300 words) were thin; now 541 and ~400-430.	Fixed

Structured Data

Signal	Finding	Status
Organization / LocalBusiness	Complete: address, geo, hasMap, hours, areaServed (12 cities), contactPoint x2, knowsAbout, makesOffer.	Good
Page-level types	Product, FAQPage, Article, BreadcrumbList, ProfilePage, WebSite, HowTo (new), SpeakableSpecification.	Good
Validity	All JSON-LD blocks parse; visible text and schema come from the same source data.	Good

GEO Analysis: 7/10

E-E-A-T Assessment

Signal	Finding	Status
Named experts	Palaniappan and Periyanan have profile pages, roles, phones and languages, and are credited on blog posts.	Good
Experience / credentials	Team background, years in trade and LinkedIn URLs are empty (data/team.ts).	Missing
Company facts	Founding year, capacity, machinery, board range, certifications and employee count are all blank in data/ownerFacts.ts.	Missing
Business email	No public business email; phones only.	Missing
Reviews / testimonials	No reviews or testimonials on site; case studies held back until real ones exist (correctly).	Missing
Contact / NAP	Full address, two phones, hours and map on every page via footer and schema.	Good

Content for AI Synthesis

Signal	Finding	Status
Factual density	Specific MOQs, ply/board grades, lead-time examples, CBM guidance, price-factor breakdowns.	Good
Clear claims	Every commercial page opens with a speakable answer paragraph stating who, what, where and MOQ.	Good
Source citation	Blog posts cite 6-9 external authorities each (FSSAI, BIS, ISTA etc.).	Good
Entity clarity	"Visalatchi Manufactures, Thiruvottiyur, Chennai" used consistently; single @id across schema.	Good
Original data	No first-party data yet (real case studies, spec table of real jobs). Components are built and waiting.	Needs Attention

Technical GEO

Signal	Finding	Status
AI crawler access	robots.txt explicitly allows GPTBot, OAI-SearchBot, ChatGPT-User, PerplexityBot, Google-Extended, ClaudeBot, Claude-SearchBot.	Good
llms.txt	llms.txt plus llms-full.txt with the full text of 26 commercial pages.	Good
Server-rendered HTML	Every route is prerendered; all content and FAQ answers are in the initial HTML.	Good
sameAs entity links	Only the Google Maps listing. No IndiaMART, JustDial, LinkedIn or Facebook profile exists yet.	Missing
Third-party mentions	Web search for the brand name and phone number returns no third-party listings.	Missing

AEO Analysis: 10/10

Featured Snippet Eligibility

Signal	Finding	Status
Direct answers	Answers under question headings average 38-46 words on the new blocks and 40-66 on posts: the snippet sweet spot.	Good
Definitions	"Visalatchi Manufactures is a bulk packaging manufacturer in Thiruvottiyur..." and "An export master carton is..." patterns now present.	Good
Lists	Bulleted and numbered lists on every commercial page and post.	Good

Signal	Finding	Status
Tables	Spec / MOQ / comparison tables on 29 pages.	Good

Structured Answer Formats

Signal	Finding	Status
FAQPage schema	Now on 27 of 39 pages (was 19), always matching visible text.	Fixed
HowTo schema	Added to /process with 4 anchored steps.	Fixed
Question headings	Every commercial, about, contact, process and team page now has 2-17 question-phrased headings (6 pages previously had none).	Fixed
Speakable	SpeakableSpecification on 27 pages (was 20), pointing at the answer-first paragraph.	Good

Voice Search Readiness

Signal	Finding	Status
Conversational phrasing	Natural "Which number should I call?", "How long does a bulk order take?" phrasing.	Good
Long-tail coverage	Who/what/where/how-much/how-long questions covered for MOQ, price, lead time, samples, export, food grade.	Good
Local signals	NAP, hours, geo coordinates and plant address spoken in plain text on /about and /contact.	Good

Note: since 2023 Google shows FAQ rich results mainly for government and health sites and has retired HowTo rich results. The markup still feeds People Also Ask, AI Overviews, ChatGPT and Perplexity, which is where it pays off here.

Local SEO: 59/100 (estimated)

Category (weight)	Finding	Score
GBP completeness (25%)	Verified listing exists (maps.app.goo.gl/F9VCUnqTkmb3cx568). Categories, photos, posts and reviews could not be checked from here. GBP service area lists 4 cities; site lists 12.	60 (est.)
NAP consistency (20%)	Website is perfectly consistent (single source in siteConfig.ts). No third-party citations found to compare against.	50
On-site local SEO (20%)	City in titles/H1s, LocalBusiness schema with geo, map embed, Chennai landing page, footer service areas.	95

Category (weight)	Finding	Score
Reviews & reputation (20%)	No reviews visible on site; Google review count unverified.	30 (est.)
Local content & links (15%)	Strong local content; no local backlinks or directory listings.	55

Estimated items could not be verified from public data; check them in the GBP dashboard.

Technical SEO: Mostly Clean

No crawler export was supplied, so the checks ran on a direct crawl of the 39 prerendered pages. Plain-English summary: Google can reach every page, nothing is bounced through redirects, and no two pages compete with the same title.

Check	Result
Redirect chains / loops	0 / 0 (clean URLs now enforced in vercel.json)
Broken internal links	0
Duplicate titles / descriptions / H1s	0 / 0 / 0
Accidental noindex	0 (only the 404 page, correctly)
Canonical mismatches	0
Orphan pages	0 (lowest page now has 2 inlinks, up from 1)

What this audit could not check: rendered mobile layout, pop-ups, image loading and anything visual. Open the top 10 pages on a phone after deploying.

Priority Recommendations

Priority	Issue	Dimension	Effort	Impact
Done	Add answer-first Q&A + FAQPage to home, about, process, contact, export, D2C and team pages	AEO / GEO	Done	High
Done	Fix heading order on /faq and /contact	SEO	Done	Low
Done	Link near-orphan landing, product and team pages	SEO	Done	Medium
Done	Add HowTo schema to /process; clean URLs + security headers	SEO / AEO	Done	Medium
Critical	Deploy this build: Vercel is not linked to GitHub, so the live site still runs an older version	All	Easy	Very high
Critical	Create IndiaMART, JustDial, TradeIndia, LinkedIn company and Facebook profiles with identical NAP; add each URL to SAME_AS	GEO / Local	Medium	Very high
High	Fill data/ownerFacts.ts: founding year, capacity, machinery, board range, certifications, lead times, business email	GEO	Easy	High
High	Ask the first 10-15 bulk customers for Google reviews; reply to every one	Local / GEO	Medium	High
High	Add team background + LinkedIn URLs in data/team.ts	GEO	Easy	Medium
Medium	Publish 2-3 real case studies and real spec rows (pages auto-appear when data exists)	GEO	Medium	High
Medium	Update GBP service area to the same 12 cities; post weekly; add 10+ plant photos	Local	Easy	Medium
Quick Win	Verify in Google Search Console + Bing Webmaster Tools, submit sitemap, run npm run indexnow after deploy	SEO	Easy	Medium

What It Takes to Reach 10/10 Everywhere

SEO 9 to 10

- Deploy, then get 10-20 relevant backlinks (directories, associations, supplier listings).
- Bring inner-page mobile performance above 90 (largest remaining cost is the JS bundle on product pages).

GEO 7 to 10

- Fill every field in src/data/ownerFacts.ts and team background/LinkedIn in src/data/team.ts; the site renders them automatically.
- Create 5+ consistent third-party profiles and add them to SAME_AS in src/lib/siteConfig.ts.
- Collect real Google reviews and publish 2-3 real case studies.

Local 59 to 90+

- Align the GBP service area with the 12 site cities, add photos and weekly posts, and build citations with identical NAP.

What's Working Well

Single source of truth: titles, descriptions, schema, sitemap and llms-full.txt are generated from the same data, and the build fails on length or duplicate errors.
Every route is prerendered, so Google and AI crawlers see full content without JavaScript.
AI crawlers explicitly allowed, plus llms.txt and llms-full.txt.
LocalBusiness schema is unusually complete: geo pin from the verified GBP, opening hours, contact points, 12 service cities.
Lighthouse Accessibility, Best Practices and SEO all score 100.
Honest content discipline: no invented reviews, prices, capacities or certifications; empty owner fields never render.

Glossary

SEO (Search Engine Optimisation): making pages easy for Google and Bing to crawl, understand and rank.

GEO (Generative Engine Optimisation): making the brand a trusted, citable source for AI answers in ChatGPT Search, Perplexity, Gemini and Google AI Overviews.

AEO (Answer Engine Optimisation): structuring content so search engines and voice assistants can lift a direct answer into featured snippets and People Also Ask.
